REMOTE MONITORING 0800 HARVEST

## Effluent Irrigator Monitoring

The Harvest Effluent Irrigator Monitor provides reliable, real-time irrigator data with failsafe control and proof of placement, to assist with effluent management and help prevent costly failures.

## Effluent Irrigator Monitor Features:

- Solar powered
- Monitors wheel speed, line pressure at irrigator and GPS (with Google Map view and 10-minute sampling for proof of placement)
- Automatic pump shutoff with alarms (failsafe) (e.g. if line pressure drops or irrigator stops moving)
- Data accessible on Harvest website (compatible with smartphones)
- Online pump control (accessible via secure webpage, compatible with smartphones)
